

# Teach Outside the Box: Team Building

A to Z

## Introduction

This team challenge requires great co-operation and organisation. Any number of people can take part but teams of six works well for this.

## You will need:

- A designated collection area (a large piece of paper or a piece of newspaper)
- A size regulator (a quoit, small hoop or other designated space for sizing)

## What to do:

Collect objects that represent each letter of the alphabet.

Make sure that the object (whole and undamaged) fits the regulation size - if it doesn't, find another one.

## Ways to Support

Provide a selection of objects as a starting point to build on.

## Ways to Extend

Challenge groups to find multiple objects.

This activity could be timed or open-ended. If teams are competing, points may be awarded for each item. Bonus points may be collected for unusual or 'thinking outside the box' items.
